

LinkedIn Before and After

Robbie Karas LinkedIn Profile

Header - Before

The header features a large background image of the James Madison University campus with red-roofed buildings and green hills. In the bottom-left corner of this image is a circular profile picture of Robbie Karas, a young man with curly brown hair wearing a dark suit, white shirt, and dark tie. A small pencil icon is in the top-right corner of the background image.

About

As a Computer Information Systems student at James Madison University with a concentration in Information and Cybersecurity Management, I am passionate about leveraging technology to build secure and efficient systems. My academic journey is complemented by hands-on experience in system administration, network defense, and software development, preparing me for a dynamic career in cybersecurity.

I possess a strong foundation in Linux environments, Python programming, and network security principles, honed through practical roles and impactful projects. My leadership experience, from spearheading a top-ranked CyberPatriot team to coordinating a university Linux club, demonstrates my ability to collaborate, problem-solve, and drive technical initiatives.

I thrive on tackling complex challenges, continuously expanding my knowledge in areas like vulnerability assessment, system hardening, and automated workflow development. I am eager to apply my skills in a professional setting, contributing to innovative solutions and robust security postures.

Open to opportunities in cybersecurity analysis, system administration, and IT support. Let's connect to discuss how I can bring value to your team.

GitHub

GitHub
GitHub
This is my GitHub, where I showcase my projects. I am also actively involved in the James Madison Unix Users Group and JMU Blockchain organizations.

Media

- The most significant design and development, including, but not limited to, the following: the design and development of the JMU Linux Club website.
- Utilize LabDash for inventory management, resource scheduling, and workflow documentation.
- Cut, sew, and test Ethernet cables to maintain reliable network connectivity within the labs.
- Assist students and faculty with lab-related tasks while ensuring safety protocols are followed.

Leadership & Activities

JMU Linux Club

August 2024 - Present

Secretary

- Coordinate weekly communications via email and manage the club's Instagram account.
- Plan and present technical sessions focused on Linux and open-source tools.
- Lead collaborative discussions to share best practices in Linux system administration.

CyberPatriot National Youth Cyber Defense Competition

August 2020 - May 2022

Hammer, VA

Team Leader

- Led high school cyber defense team in national CyberPatriot competitions.
- Secured two Gold Tier rankings by defending virtual networks through system hardening and security policy implementation.
- Collaborated with teammates to perform vulnerability assessments and develop defensive strategies.

Projects

Syllabus-to-Calendar Generator

JavaScript, Python, Google Calendar API, Google Gemini API, GitHub Pages

- Built a web tool that converts course syllabi into 'ics' calendar files with assignments and exam dates.
- Used JSON-based directives with the Google Gemini API to generate structured calendar data.
- Deployed a zero-install front end via GitHub Pages with automated builds using GitHub Actions.

Wrights Wedding Map

JavaScript, Leaflet.js, OpenStreetMap, Heroku

- Built an interactive mobile-friendly map for wedding guests showing key locations and routes.
- Used Leaflet.js with OpenStreetMap data to avoid API costs and enable responsive navigation.
- Added features like tagging locations and direct Google Maps directions for travel logistics.

Text-to-Speech Image Narrator

Python, MoviePy, edge-tts, JSON-Driven Templates

- Built a Python tool that generates narrated, captioned videos from image inputs.
- Created a JSON-driven pipeline for configuring images, voices, overlays, and render settings.
- Integrated advanced text-to-speech and image-to-video APIs to create high-quality narrated video content.
